

Our solar energy system

SAVING MONEY AND THE ENVIRONMENT

You can't see it from the parking lot, but on top of the Thurston County Food Bank warehouse is a solar energy system that is helping us save money and reduce our carbon footprint. Running a large warehouse with refrigerators requires a lot of energy, and reducing this operational cost has been a goal for us. We received funding in 2016 that allowed us to install this solar energy system, which means that every dollar we save on our electricity bill goes back to helping our clients!

300 SOLAR PANELS MAKE UP A 87 KW SYSTEM

SAVINGS OF \$10,000 A YEAR PUT INTO PROGRAMS

LITTLE TO NO MAINTENANCE REQUIRED

SYSTEM PROVIDES FREE ELECTRICITY FOR 25 YEARS

GO SOLAR TO BENEFIT THE FOOD BANK

If you or a friend are interested in learning more about solar energy, contact A&R Solar, the company that installed our system. If you mention the food bank as the referrer, you will get up to \$500 off your system, and the food bank will receive a check of equal value when your installation is complete.
